

Smartsheet for Hospitality

Overview

In the hospitality industry, the number one priority is to improve the guest experience. Smartsheet sets up hospitality program managers and teams with real-time information and the right tools so that they can focus on designing and delivering exceptional service.

Whether you're in charge of remodeling guest suites, building new hotels, managing inventory and supplies, or streamlining event management, Smartsheet can help you track budgets, standardize hotel operations, accelerate the procurement process, and more. All while strengthening stakeholder confidence and maintaining a superb environment for your clients.

How Does Smartsheet Help My Organization?

Deliver exceptional experiences by executing with consistency and precision.

Inventory Management/Hotel Operations

Easily keep track of supplies needed for each hotel property with forms and automated processes that enable smooth operations to notify procurement teams.

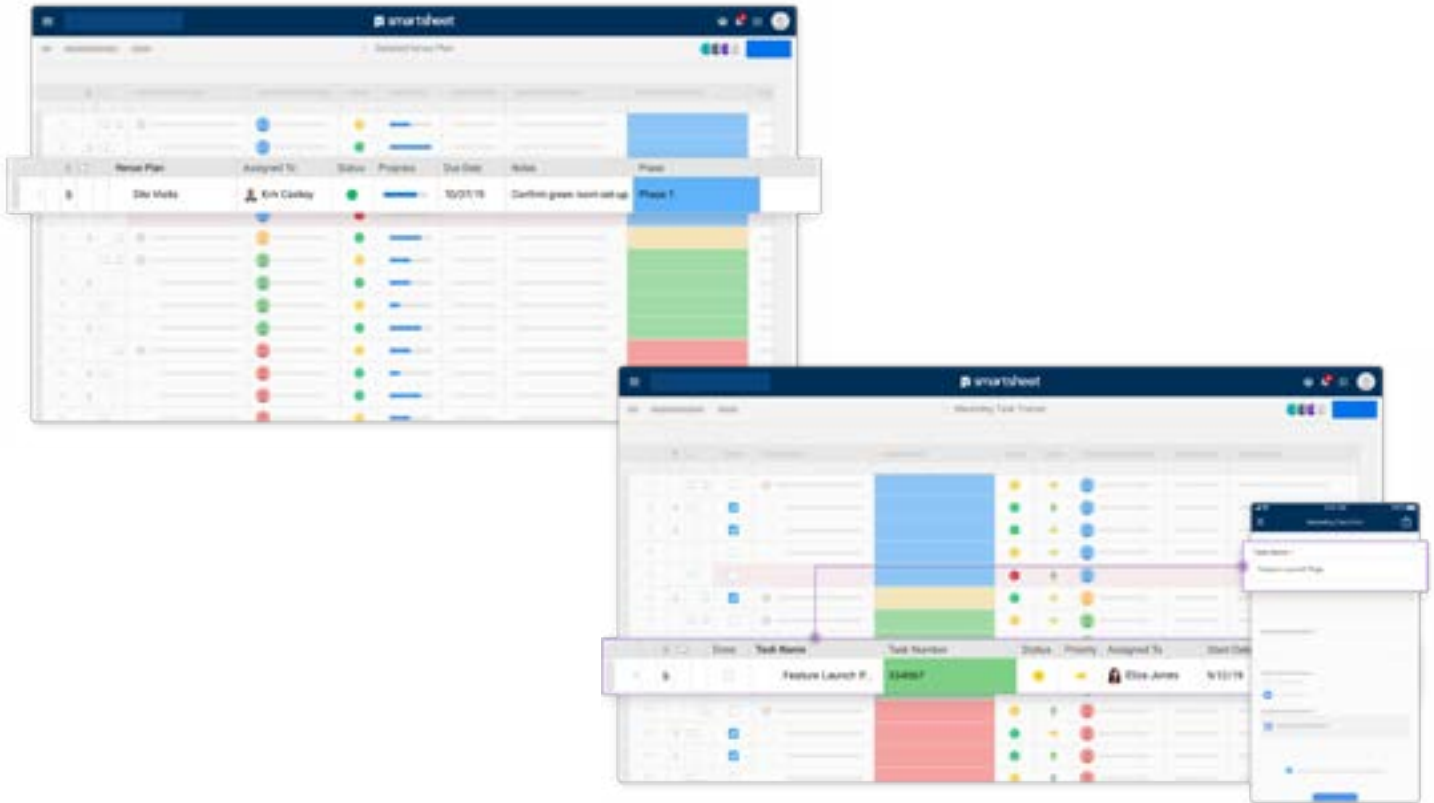

Hotel Openings and Renovations

Open hotels on time and under budget. Enable visibility into construction and renovation projects, and recognize new hotel revenue faster.

Event Management/Programming

Streamline planning, increase stakeholder confidence, and collaborate through mobile devices to improve day-of event execution.

Key Benefits

Visibility

Self-service reports and dashboards provide real-time visibility into resources, status, and performance, so you can rapidly align operations to strategy.

Flexible Control

Smartsheet gives you complete control to make changes or enforce structure for your collaborative work — no coding required.

Simplicity

Smartsheet's familiar interfaces, designed for how people really work, lead to rapid and broad adoption across your organization.
