

Smartsheet for Life Sciences

Overview

In a highly regulated and competitive environment, securely sharing trial information, improving product development efficiency, and scaling repetitive processes are critical for success. Pharmaceutical and biotechnology companies trust Smartsheet to assist efforts in developing, managing, and testing products so that patients receive the treatment they need — all while focusing on the next breakthrough solution.

Smartsheet enables life sciences organizations to manage clinical trials, mergers and acquisitions, and their IT PMO to drive greater cross-team alignment and stakeholder visibility, while strengthening internal and external confidence in these breakthrough solutions.

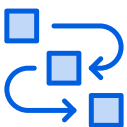

How Does Smartsheet Help My Organization?

Increase efficiencies within your data management processes to better serve your patient community.

Manage Clinical Trials and Tests

Create a standard process for your trial management and testing procedures. Easily and efficiently organize contracts, timelines, and results.

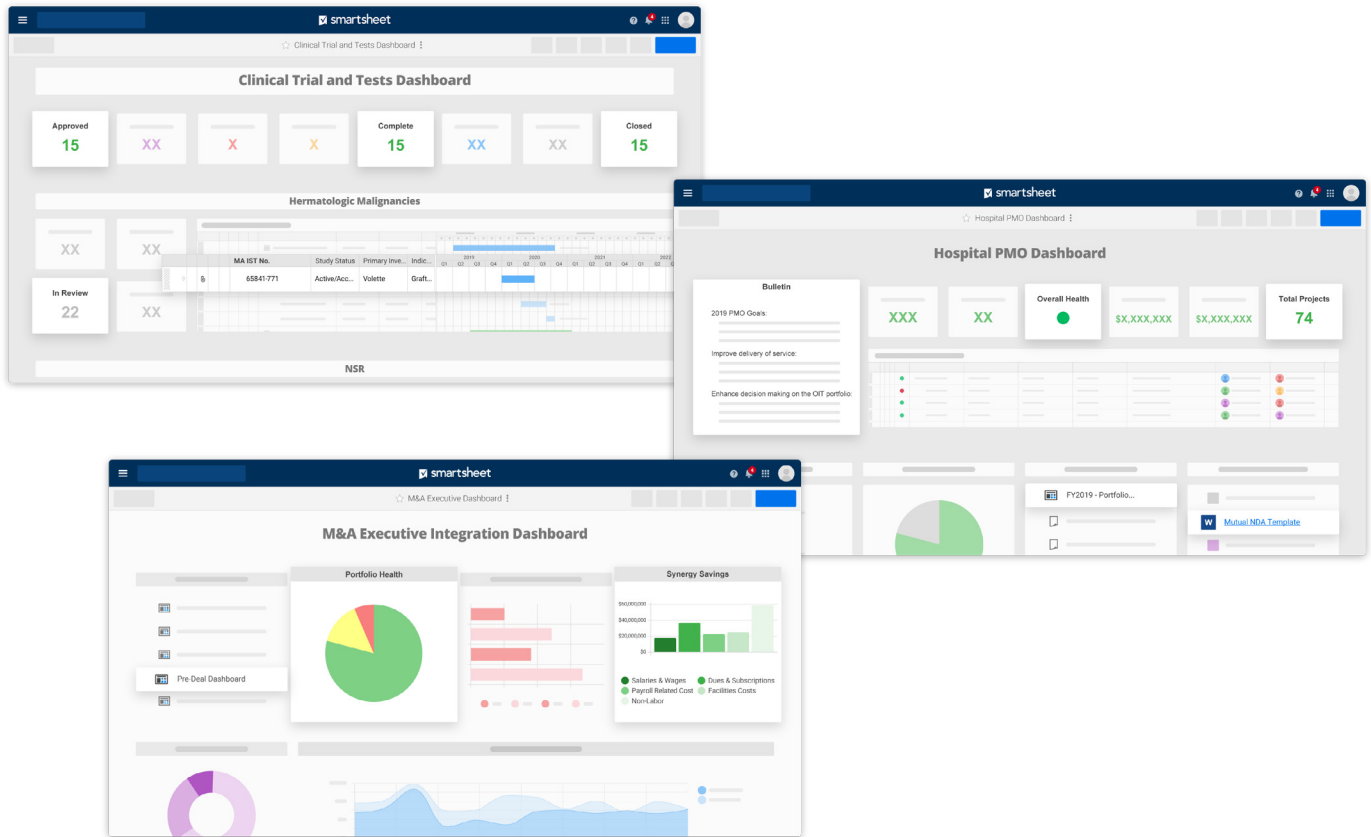

IT PMO

Securely solve business challenges fast with proven solutions that provide clear program visibility, instant business value, and manage data confidentially.

Mergers and Acquisitions

Accelerate target and predeal evaluations, streamline due diligence while managing multiple work streams, which are easily adoptable by stakeholders.

Key Benefits

Visibility

Self-service reports and dashboards provide real-time visibility into resources, status, and performance, so you can rapidly align operations to strategy.

Flexible Control

Smartsheet gives you complete control to make changes or enforce structure for your collaborative work — no coding required.

Simplicity

Smartsheet's familiar interfaces, designed for how people really work, lead to rapid and broad adoption across your organization.
